Scenario 1 - Let's Discuss

You're playing a game to practice some vocabulary with your students. As the game progresses, the class' volume and behaviour gradually get out of hand. Now, you're having a hard time getting everyone to return their focus to the game.

Scenario 2-Let's Role-Play

You are reading a passage from the textbook with your students. You notice that some students are mocking your pronunciation and are repeating after you in an exaggerated manner. Your JTE moves to stand closer to the students but they continue with their behaviour.

Let's hear from you!
